PROFILE

Motivated and results driven B.Sc. (Hons) in Computer Science and Technology graduate with hands on experience in MERN Stack development, Unity (C#), and business application development. Developed multiple enterprise systems, including Order Management, QR-Based Ordering, Inventory Management, and Network Marketing platforms during my internship as a Junior Executive System Development. Later gained experience as a Junior Marketing Executive, working on digital marketing strategies, campaign management, and analytics for wellness and cosmetic brands. Passionate about developing scalable software solutions, solving business challenges, and continuously expanding technical expertise.

WORK EXPERIENCE

Fadna Tea | 2026 – Present

Junior marketing Executive

- Plan and execute digital marketing campaigns across Meta platforms.
- Develop marketing content and promotional materials for herbal tea and cosmetic products.
- Coordinate with designers, doctors, and influencers for content creation.
- Analyze campaign performance using marketing analytics and reporting tools.
- Support brand positioning, product launches, and customer engagement initiatives.

Fadna Life Sciences | 2025 – 2026

Junior System Developer

- Designed and developed enterprise web applications using the MERN Stack.
- Designed responsive user interfaces, RESTful APIs, and MongoDB database structures.
- Implemented authentication, role-based access control, reporting, and dashboard modules.

EDUCATION

Sabaragamuwa University of SriLanka | 2021 – 2025

Bachelor of Science Honours in Computer Science and Technology
Second Class (Lower Division)

Pinnawala Central Collage | 2021 – 2025

G.C.E. Advanced Level - Physical Science Stream

TECHNICAL SKILLS

- Programming Languages: JavaScript, C#, Python
- Frameworks: React, Tailwind CSS, HTML, CSS, Node.js, Express.js, Supabase
- Database: MongoDB, MySQL
- Tools: Git, GitHub, VS Code, Postman, Unity

PROJECTS

Order Management System (OMS)

- Designed and developed a full-stack Order Management System (OMS) from scratch.
- Built a centralized platform for order processing, customer management, and product management.
- Integrated multiple sales channels for real time order tracking and management.
- Developed dashboards and reporting modules for sales and operational performance.
- Implemented secure authentication and role-based access control.
- Deployed and maintained the application, improving operational efficiency and reducing manual processing.

QR-Based Online Ordering & Sales Monitoring System | MERN Stack

- Designed and developed a full-stack QR-Based Online Ordering & Sales Monitoring System.
- Generated unique QR codes for each salon, enabling customers to place orders instantly through QR scanning.
- Developed modules to monitor daily salesman activities, including salon visits, active salons, revisit salons, and customer engagement.
- Built performance dashboards to track daily and weekly salesman KPIs
- Deployed and maintained the application to support business operations.

Inventory Management & Forecasting System

- Designed and developed a full-stack Inventory Management & Forecasting System.
- Built inventory modules for stock-in, stock-out, and real-time inventory tracking.
- Developed forecasting algorithms to estimate inventory and production requirements based on historical sales data.
- Created dashboards for inventory monitoring, stock analysis, and forecasting insights.
- Deployed and maintained the application, improving inventory accuracy and production planning.

Network Marketing Management System | MERN Stack

- Designed and developed a full-stack MLM system for agent, product, order, and commission management.
- Implemented multi level agent registration, customer ordering, and automated commission calculations.
- Built dashboards for sales, revenue, agent performance, and product analytics.
- Developed reporting modules with Excel export and real-time order tracking.
- Implemented secure authentication, role-based access control, and QR code integration.

Paint Puzzle Game | Unity, C#

- Developed a 2D color matching puzzle game using Unity and C#.
- Implemented multiple levels, increasing difficulty, and event driven gameplay mechanics.
- Designed game logic, UI, player interactions, and level progression.
- Improved problem solving gameplay through interactive puzzle mechanics.
